

```
package ch.unibe.testdata;

public class Apple {
    public static void print() {
        String name = "Apple";
        System.out.println("Hi from " + name);
        int a = 10;
        while (a > 0) {
            System.out.println("a" + a);
            a -= 1;
        }
        for (int i = 0; i < 10; i++) {
            System.out.println("i" + i);
        }
        System.out.println("finished");
        return;
    }
}
```

```
package ch.unibe.testdata;

public class Pear {
    public static void print() {
        String name = "Pear";
        System.out.println("Hi from " + name);
        int a = 10;
        while (a > 0) {
            System.out.println("a" + a);
            a -= 1;
        }
        for (int i = 0; i < 10; i++) {
            System.out.println("i" + i);
        }
        System.out.println("finished");
        return;
    }
}
```
